“It’s wonderful how the system warns me when I’m low on inventory, and I can fax an order right to my vendor from the PC!”
Sylvia Davis – Sylvia’s Antiques

EnterprisePOS

Inventory Features

Product Tracking: keep track of different types of inventory including services, consigned items (not owned by you), custom assembly / internally designed products or “kits”, vendor re-ordered items, and raw materials. Each type of product is specially handled for accurate quantity and cost control.

Location Tracking: keep track of exactly *where* product goes in the store.

Purchase Order (PO) Tracking: keep track of vendor orders to replenish stock automatically when inventory is low!

Special Order Tracking: place an order for a customer and the system will automatically create all vendor orders.

Powerful Search Engine: create search queries on any number of fields in the database to display or print your data in any way!

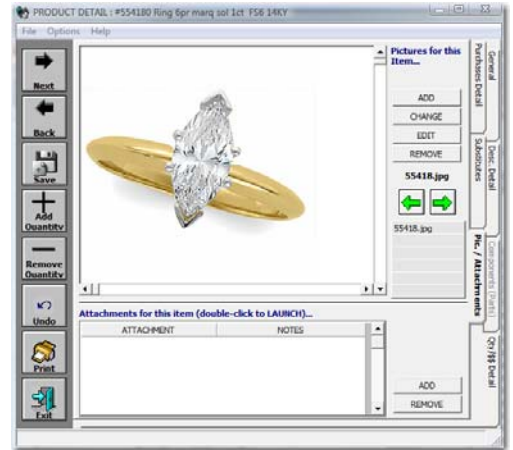

Cost-Date Stamping: track cost changes by date from previous orders and allow the user to select items that may have quantities with different costs at the point-of-sale.

Multi-Tax Levels: setup different tax rates for products or customers.

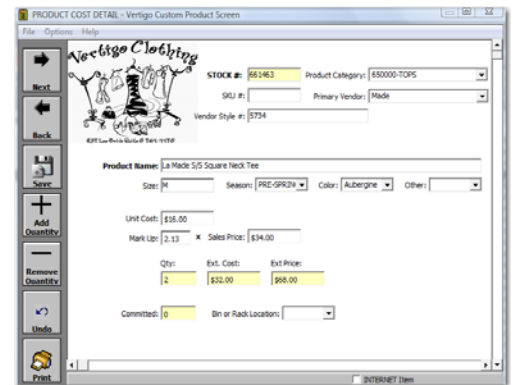

Monthly Issues: issue product to customers on designated days each month.

Bar-Coding: assign bar codes to inventory to scan product labels to display information in seconds!

Color Photos of Products: store snapshots of inventory items when available. If you’re out of stock, you can show the customer a picture of the product and order the item on the spot.

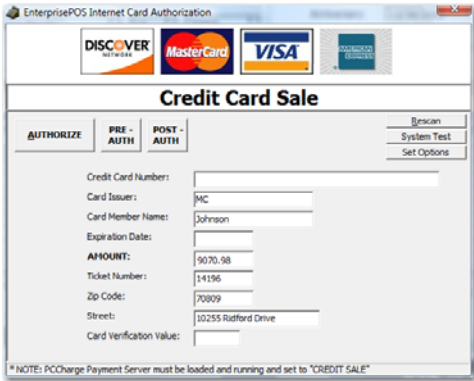

Custom Product Screens: Design your product screens to fit your business!

Automatic Stock Numbering: automatically number your inventory based on product category criteria for easy tracking.

POS Features

On-Line Credit Card Authorizing: quickly authorize any credit/debit card, gift card, or check over any Internet connection at the point-of-sale without the need for a separate machine!

Future Sale Tracking: keep track of product layaways.

Consignment memos: consign your own products to customers.

Tender Types: pay with cash, check, charge, store credit, gift certificates, etc. or any mixture of multiple payments types on any given invoice.

Advanced Credit Tracking: store credits from returns, gift certificates, deposits, trades, coupons, group discounts, etc.

Sales Commission Tracking: keep track of how your employees are doing.

Sales Tax Tracking: keep track of tax rates for cities, parishes, counties, etc.

Hardware Interfaces: use a hand-scanner for bar code reading, a receipt printer, a cash drawer, etc.

Fast Sales Features: do high volume sales with the many "quick keys" available or use a touch-screen.

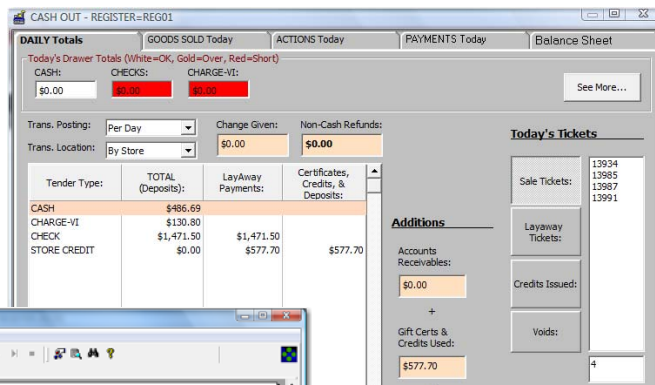

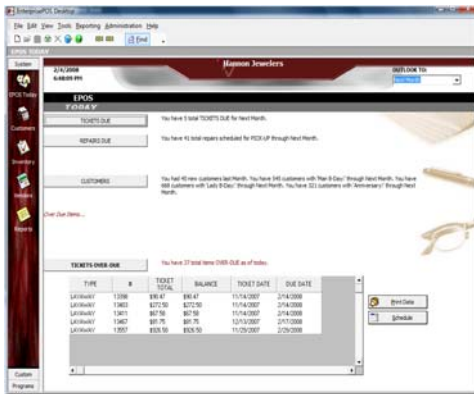

Custom Sales Screens: create your own sales screen with your company logo!

Customer History Tracking: find all account activity on a customer to date whether it's a sale, layaway, refund, return, credit, wish, etc.

Magnetic Strip Reading: swipe a customer's drivers license at the point-of-sale to get all their information!

Simple Cash-Out Screen: see a detailed daily analysis screen when you balance your cash drawer that includes a balance sheet to import the day's transactions into any accounting software!

Notifications: get notified when customers are late on payments!

CASH OUT Module
 Display/print all transactions for the day!
 Send a balance sheet to QuickBooks!
 Even print your bank deposit!

Custom Sales Screens
 Design your own check-out screens...
